***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention (assuming all claims meet 112 second paragraph requirement):

I. Species of the embodiment disclosed on page 28, lines 1; in particular, the species that requires the creation of a spool file and the index file is created from the created spool data file.

II. Species of other specific form disclosed on page 41, lines 1-2; in particular, the claimed invention of the species of creating the index file without the requirement of: creating a spool file and the index file is created from a spool data file.

2. For species II; the claims are further directed to the following patentably distinct species of the claimed invention:

A(II); the species of the embodiment disclosed on page 44, lines 6-7, of original disclosure.

B(II) the species of the embodiment disclosed on page 44, lines 8-9, of original disclosure.

C(II) the species of the embodiment disclosed on page 44, lines 10-12, of original disclosure.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Art Unit: 2625

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to King Y. Poon whose telephone number is 571-272-7440. The examiner can normally be reached on Mon-Fri 8:00-4:30.

Art Unit: 2625
